

The Mothers' Group

The Mothers' Group brings together women of diverse backgrounds sharing virtually identical difficult situations to share support and tears. While emphasizing these common bonds between strangers, the story also provides an enlightening insight into the symptoms, treatment - and heartbreak – of AIDS in the 1980's and 1990's. PFLAG members will recognize the almost universal sense of guilt shared by parents and families of children facing some of life's most difficult problems, as well as the wonderful support offered by The Mothers' Group.
